**Re: Crawford Street Corporation's Response to Request for Information**

Dear Ms. Koch:

The enclosed submission and accompanying documents constitute the response by Crawford Street Corporation ("Crawford") to the U.S. Environmental Protection Agency ("EPA") Request for Information dated January 18, 2008 (the "Information Request").

Crawford's submission of the enclosed written responses and accompanying documents are made without waiver of any objections or other rights and should not be construed as an admission of any kind. General and specific objections are asserted at the beginning of the enclosed written response, and additional specific objections are included in the response to individual requests. For convenience, Crawford has included each request in bold font followed by the relevant response. Where a response references a document, the document is identified by Bates stamp number(s). Also enclosed is Crawford's privilege log, which identifies all documents withheld from Crawford's production based on a privilege or the work product doctrine.

Certain documents produced in response to the Information Request constitute or contain "Confidential Business Information" as defined in 40 C.F.R. Part 2. Crawford has designated documents containing Confidential Business Information on the face of each such document and has provided those documents in a segregated production.
